

December 11, 2025: **Harmful Escalations from Team Trump's Criminal Conspiracy**

Speaker Burrows,

I am writing again to report to you that the criminal spying campaign that is being pressed over the entirety of my life is still continuing and is apparently escalating in harmful behavior as Donald Trump remains hopelessly committed to his ongoing 'eye for an eye' tactics.

Rep. Burrows, Dustin

Thank you. Our office has received your feedback.

Personally, I have already tried to remain 'silent' or 'still' in order to let this operation 'blow over' and move on from our lives - I am certainly not attempting to create more of this problem or escalate this problem in any way. As I previously mentioned, I even moved my family to Spain to rid our lives of this problem and they intentionally showed up at our front door within the first 10 days of our arrival.

It is becoming plainly clear over the last three years now that Donald Trump's team is going to spy on me and threaten me whether I accept it or fight to free myself from its grasp.

I am alerting your office that the team surrounding the President of the United States of America is using Space-X Starshield technology to hold my home in what is arguably defined as a 'false imprisonment' as a means of 'catching and killing' my ability to file lawsuits against them, hold them accountable for, or even publicly expose them for, their criminal enterprise.

There is absolutely no other way to describe the facts of our current life to be anything other than being held down and raped repeatedly for emotional and psychological responses by a team that is completely above the law in any form of accountability for their criminal actions.

I am also certain that this originated within the military community. This has all of the hallmarks of an illegal coup de tat of unaccountable military personnel that are causing harm to innocent American citizens by waging psychological warfare on their lives.

This has been going on for at least three years now and we need to see some form of action be taken to hold them responsible for their actions or at least to curtail their continuing operations against our home.

Thank you for your understanding and for your attention to this important matter.

Kindest regards,

Chris Carlin
